AI/ML in Agriculture - Interacti | AI Virtual Lab - CNN & SVM Int

cnn-svm.vercel.app/naive-bayes

Build Your Own Classifier

MEDIUM 20 points Completed!

Add at least 3 custom training examples and test your classifier.

Success Criteria:
Add 3+ custom examples and classify a message

Need a hint?

Success! 🎉
You've completed the challenge! +20 points

Handle Edge Cases

HARD 30 points Completed!

Test your classifier with ambiguous messages that could be either spam or ham.

Success Criteria:
Classify 3+ different test messages

Need a hint?

🎉 Congratulations!

You've completed all Naive Bayes challenges!

Total points earned: 60

cnn-svm.vercel.app/kmeans

Place Centroids Strategically

MEDIUM 20 points Completed!

Switch to manual mode and place initial centroids yourself. Try to place them in good starting positions.

Success Criteria:
Place centroids manually and run the algorithm

Need a hint?

The Worst Initialization

HARD 30 points Completed!

Can you find the worst possible initial centroid placement? Place all centroids close together and see what happens!

Success Criteria:
Place centroids poorly and observe suboptimal clustering

Need a hint?

Success! 🎉
You've completed the challenge! +30 points

🎉 **Congratulations!**

You've completed all K-Means challenges!

Total points earned: 60

cnn-svm.vercel.app/logistic-regression
Experiment with different threshold values and see how it affects classification.
Success Criteria:
Adjust threshold at least 3 times
Need a hint?
Non-Linear Patterns
HARD
30 points
Completed!
Create a dataset that would benefit from polynomial features.
Success Criteria:
Create a non-linearly separable dataset
Hint 1:
Try circular or curved patterns
Show next hint (1/3)
Success! 🎉
You've completed the challenge! +30 points
🎉 Congratulations!
You've completed all Logistic Regression challenges!
Total points earned: 60

AI/ML in Agriculture - Interactiv | AI Virtual Lab - CNN & SVM In

cnn-svm.vercel.app/ann

Go Deeper

MEDIUM 20 points Completed!

Create a deep network with at least 4 layers and observe how depth affects learning.

Success Criteria:
Create and train a network with 4+ layers

Need a hint?

Activation Function Experiment

HARD 30 points Completed!

Build a network using different activation functions in different layers.

Success Criteria:
Use at least 2 different activation functions

Need a hint?

Success! 🎉
You've completed the challenge! +30 points

🎉 Congratulations!

You've completed all ANN challenges!

Total points earned: 60

ai ml agriculture by reva univer | AI/ML in Agriculture - Interactiv | AI Virtual Lab - CNN & SVM Int

cnn-svm.vercel.app/decision-tree

Create a Perfect Split

MEDIUM 20 points Completed!

Design a dataset where the first split perfectly separates Yes and No outcomes (Gini = 0 for leaf nodes).

Success Criteria:
Build a tree where both leaf nodes have Gini = 0

Need a hint?

Test Your Tree

MEDIUM 15 points Completed!

Build a tree and make at least 3 different predictions with different test inputs.

Success Criteria:
Make 3 successful predictions

Need a hint?

Success! 🎉
You've completed the challenge! +15 points

🎉 Congratulations!

You've completed all Decision Tree challenges!

Total points earned: 45

SVM Virtual Lab
Experiential Lear
Create a dataset and identify which points become support vectors (marked with black circles).
Success Criteria:
Have at least 3 support vectors identified
Need a hint?
Non-Linear Separation
HARD
30 points
Completed!
Create a dataset that cannot be separated by a straight line, then switch to RBF kernel.
Success Criteria:
Use RBF kernel with a non-linearly separable dataset
Need a hint?
Success! 🎉
You've completed the challenge! +30 points
🎉 Congratulations!
You've completed all SVM challenges!
Total points earned: 75
