Training Visualization
Evaluation Dashboard
Free Exploration Mode
Click to add points and watch SVM find the optimal decision boundary with maximum margin!
Add red and blue points to see SVM decision boundary
Clear
Random
Points: 6
Left-click: Add/Change class
Right-click: Delete point
SVM Parameters
Kernel Type
Linear (straight line)
RBF (curved boundary)
C (Regularization)
0.1
Statistics
Total points: 6
Class 0 (Red): 3
Class 1 (Blue): 3
Support vectors: 6
Try This
Add points close to the boundary
See which become support vectors
Try different kernel types
Adjust C to see margin changes
SVM Results:
Support Vectors: 6
Margin: 71.522
Kernel: LINEAR
Points with black circles are support vectors - they define the decision boundary!
